Product Descriptions

Recommended Uses:

Wilsonart® Solid Surface Cast Sinks and Bowls are specially shaped solid surface products commonly used as kitchen sinks, bar sinks, and lavatory bowls. They may be bonded to Wilsonart Solid Surface panels with Wilsonart Seam Kits to create a seamless appearance for aesthetic appeal and easy maintenance.

Product Composition:

The product is composed of a proprietary mixture of resins and minerals. Wilsonart Solid Surface Cast Sinks and Bowls are completely homogeneous. The full-toned color has a consistent, uniform pigment throughout the thickness of each bowl.

Wilsonart Solid Surface Cast Sinks and Bowls are not color-matched to any solid surface sheets in the Wilsonart Solid Surface line. There will be a slight variation in color when sinks and lavatory bowls are bonded to a solid color design in the Wilsonart Solid Surface line. This is considered normal and not a color issue.

Care and Maintenance

Wilsonart Solid Surface Cast Sinks and Bowls are composed of a proprietary mixture of resins and minerals. Wilsonart Solid Surface Cast Sinks and Bowls are completely homogeneous and are very hygienic, highly stain resistant, and extremely durable. The full-toned color has a consistent, uniform pigment throughout the thickness of each bowl. Its luxurious matte finish enables the sink to keep its beauty for years with minimum day to day care and maintenance.

Wilsonart® Solid Surface Cast Sinks and Bowls may be cleaned with warm water and mild soaps, such as those used for hands and dishes. Mild abrasive cleaners such as Bon-ami®, Comet® or Soft Scrub® also work very well.

For stubborn residue, apply one of the mild abrasives cleaners above and with a green Scotch-Brite® pad, buff in a circular motion over the entire sink to blend finish.

Simple Precautions

- Run warm water if pouring boiling water in sink
- Allow cookware to cool before placing in sink
- Do not expose the surface to harsh chemicals, such as paint remover, turpentine, nail polish remover (acetone) or stove and drain cleaners. If the chemicals come in contact with the surface, immediately wash them off with water, using appropriate safety measures to avoid injury.

Regular maintenance will keep your sink performing at a high standard and will also keep it looking great.
