| 5.2. Special hazards arising from the su | rom the substance or mixture  |  |
| Fire hazard                              | : Flammable liquid and vapour.  |  |
| Explosion hazard                         | : Static discharge may serve as an ignition source for this product.  |  |
| 5.3. Advice for firefighters             |   |  |
| Firefighting instructions                | : Exercise caution when fighting any chemical fire. Do not dispose of fire-fighting water in the<br>environment. Prevent human exposure to fire, fumes, smoke and products of combustion. |  |
| Protection during firefighting           | : Do not enter fire area without proper protective equipment, including respiratory protection.   |  |

| 6.1. Personal precautions, protective of | Personal precautions, protective equipment and emergency procedures  |  |
|--|--|--|
| General measures                         | : Evacuate area. Keep upwind. Ventilate area. Spill should be handled by trained clean-up crews properly equipped with respiratory equipment and full chemical protective gear (see Section 8). Avoid vapor formation. In case of spills, beware of slippery floors and surfaces. Eliminate all sources of ignition. |  |
| 6.1.1. For non-emergency personnel       |  |  |
| Protective equipment                     | : Wear Protective equipment as described in Section 8.   |  |
| Emergency procedures                     | : Evacuate unnecessary personnel.  |  |
| 6.1.2. For emergency responders          |  |  |
| Protective equipment                     | : Wear suitable protective clothing, gloves and eye or face protection. Approved supplied-air respirator, in case of emergency.  |  |
| 6.2. Environmental precautions           |  |  |

Prevent entry to sewers and public waters. Avoid release to the environment.

### 6.3. Methods and material for containment and cleaning up

| For containment                  | : Contain any spills with dikes or absorbents to prevent migration and entry into sewers or<br>streams.   |
|----------------------------------|---|
| Methods for cleaning up          | : Remove all sources of ignition. Avoid breathing of vapors. Wear appropriate respirator and other protective clothing. Ventilate. Shut off source of leak only if safe to do so. Soak up with absorbent material, and place in non-leaking containers for proper disposal. |
| 6.4. Reference to other sections |   |

## **SECTION 7: Handling and storage**

|                               | <u> </u>  |   |
|-------------------------------|---|---|
| 7.1.                          | Precautions for safe handling                                     |   |
| Precautions for safe handling |   | : Keep away from heat, sparks and open flames. Use adequate ventilation and avoid repeated or prolonged skin contact. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapour. Ground/bond container and receiving equipment. Prohibit smoking in storage area. |
| 7.2.                          | 7.2. Conditions for safe storage, including any incompatibilities |   |
| Storag                        | e conditions  | Store in a well-ventilated place. Keep container tightly closed. Isolate from oxidizers, heat, sparks, electrical equipment and open flame. Closed containers may explode if exposed to   |

sparks, electrical equipment and open flame. Closed containers may explode if exposed to extreme heat. Store in a cool dry place. Prohibit smoking in storage area. Do not store with acids or oxidizers. Electrical service in storage area must be rated for flammable liquids.

#### 8.2. Exposure controls

Appropriate engineering controls

: Provide adequate general and local exhaust ventilation. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Use explosion-proof equipment with flammable materials. Ensure adequate ventilation, especially in confined areas.

Personal protective equipment

Hand protection

Eye protection

Skin and body protection

Respiratory protection

: Safety glasses. Gloves. Protective clothing. Insufficient ventilation: wear respiratory protection.

: Use gloves chemically resistant to this material when prolonged or repeated contact could occur. Gloves should be classified under Standard EN 374 or ASTM F1296. Suggested glove materials are: Neoprene, Nitrile/butadiene rubber, Polyethylene, Ethyl vinyl alcohol laminate, PVC or vinyl.

- : Wear eye protection, including chemical splash goggles and a face shield when possibility exists for eye contact due to spraying liquid or airborne particles.
- : Wear long sleeves, and chemically impervious PPE/coveralls to minimize bodily exposure.
- : Wear a NIOSH-approved (or equivalent) full-facepiece airline respirator in the positive pressure mode with emergency escape provisions. In case of inadequate ventilation or risk of inhalation of

vapors, use suitable respiratory equipment with gas filter (type A2). Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, exposure levels are not

known, or any other circumstances where air-purifying respirators may not provide adequate protection.
