

Any fabrication procedure or technique not contained within the Wilsonart® Solid Surface Fabrication Manual will not be recognized by Wilsonart, LLC as an approved method of fabrication. Deviations from these techniques must be approved in writing by a Wilsonart Representative.

General Safety:

Safety is a critical concern for any shop and key to a successful business. The following safety rules should be incorporated into your safety program to help prevent an accident. Safety training, knowledge, product use and environment are the responsibility of the facility owner and the shop employees.

CAUTION: Always follow product, equipment and/or tool manufacturer's recommendations and instructions carefully.

- Read directions carefully before fabricating/installing Wilsonart® Solid Surface.
- Read and follow the instruction manual before operating the different tools.
- Keep all guards in place and in working order.
- Ensure all tools are properly grounded. Never remove the third prong.
- Keep work area clean, uncluttered and well lit.
- Don't use electric power tools in a damp or wet work area.
- Keep visitors at a safe distance from the work area.
- Use the right tools. Don't force a tool or attachment to do a job it was not designed to perform.
- Always use safety glasses or approved eye protection and/or face shield, ear/noise protectors and safety shoes. (FIG. 4A & 4B)
- Wear the proper apparel, no loose clothing or jewelry.
- Secure all work with the proper clamp or vise to a stable work surface.
- Don't overreach. Keep proper footing and balance at all times.
- Maintain tools in top condition. Disconnect tools before servicing and when changing accessories such as blades, bits, cutters, etc.
- Keep and use denatured alcohol, adhesives and materials in a safe, ventilated place.
- Dust collection should be used when cutting, routing and sanding. Tools should be used with dust collection at all times.

CARE AND MAINTENANCE

Surface Maintenance and Guidelines:

PLEASE REFER TO OUR CDC CLEANING & DISINFECTION GUIDELINES FOR SPECIFIC INSTRUCTIONS ON CLEANING AND DISINFECTING HARD SURFACES.

To clean Wilsonart® HPL, Solid Surface or Quartz surfaces on a daily basis, all you need is dishwashing liquid, warm water and a microfiber cloth. Apply a mixture of dish soap and water to your counters using the cloth. As you wipe the surface, rinse your cloth in clean water. Wilsonart recommends the following cleaners:

Windex

Diluted Bleach Solution

As with any disinfectant, soiled surfaces need to be cleaned with water and detergent first. When properly used, bleach is a strong and effective disinfectant – its active ingredient, sodium hypochlorite, is effective in killing bacteria, fungi and viruses. A diluted bleach solution* following CDC mixing guidelines is an acceptable chemical disinfectant if used appropriately.

- A bleach solution may be prepared by mixing:
 - o 5 tablespoons (1/3 cup) bleach per gallon of water or,
 - o 4 teaspoons bleach per quart of water.
- CDC recommends a contact time of at least one minute.
- Exposure of a bleach solution should not exceed two minutes.
- Always rinse thoroughly with warm water and soap and water after use
- Follow manufacturers' guidelines and safety precautions.

BRANDED CLEANERS & DISINFECTANTS

The following branded cleaners and disinfectants have been tested on Wilsonart® surfaces based upon ISO 4586-2 Method 31 (B) and BIFMA HCF 8.1-2014 (Section 6/Modified) test standards. Results vary by product type and can be found on our Technical Data Sheets. Please see links on page 2.

To determine if a product is registered with the EPA for use against SARS-CoV-2, the virus that causes COVID-19 refer to EPA: List N: Disinfectants for Use against SARS-CoV-2.

SOLID SURFACE

QUARTZ

CAUTION - Cleaners and disinfectants with the following active ingredients in various mix ratios and solutions may pose a threat to any surface and cause irreparable damage. Prolonged exposure of the surface to bleach will cause discoloration.

- Peroxide(s)
- Bleach (sodium hypochlorite)
- Strong acids (phosphoric acid is often used, very low pH values)
- Strong bases (sodium hydroxide, potassium hydroxide, high pH values)

As is the case with all cleaners, exposure time is the key. Often surface damage is due to poor removal of the cleaning agent (spills, drips, etc. that are not removed). It is recommended to test a cleaner on a small area of the surface first. Prolonged exposure, chemical dilutions and frequency of cleaners, disinfectants, and/or sanitizers used on the surface can cause degradation and/or discoloration.

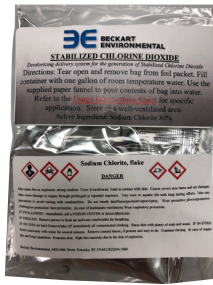

For additional information on how to properly clean & disinfect your surfaces, please refer to the following documents that can be found at www.wilsonart.com/performs/cleanability:

- **CDC Cleaning & Disinfection Guidelines**
- **Care & Maintenance Instructions**
 - **Wilsonart® HPL and Wilsonart® HD®**
 - **Wilsonart® Solid Surface**

 - **Wilsonart® Quartz**

When in question of cleaners, detergents, disinfectants or chemicals found in them, please contact the Wilsonart Technical Services team at 1.800.433.3222 for review and determination of how it will affect Wilsonart® surfaces.
