

Surfaces for Residential

The **Wilsonart® Quartz Cut-to-Size** collection includes 15 thoughtfully selected designs ideal for Residential kitchens and bathrooms. Available to order in any custom size, this collection of designs meets value-conscious requirements to fulfill your ever-changing project needs. Proud to be a Texas-based company since 1956, Wilsonart is backed by nationwide distribution and a reputation for service you can count on.

Why Wilsonart® Quartz?

- Quartz is very hard and dense, making it highly resistant to abrasion and scratching, versus softer materials.
- Quartz is the least porous material among all surface types, which means high-stain resistance with limited repairs or maintenance, versus materials like granite.
- Quartz is a man-made product using up to 93% quartz. Elegant while being tough and durable, Wilsonart Quartz is a stylish, sleek, and strong surface with performance features that make this one of the most popular surfacing materials on the market today.
- Certifications include: Declare label recipient and LBC Red List Free, UL GREENGUARD® Gold Certification for indoor air quality, NSF 51 Food Zone and FDA food contact compliance, and Orthodox Union Kosher Certification.

Design

- ✓ Classic designs that fit into any project
